Introduction

Stantec Consulting and Salt Lake County commissioned Dan Jones & Associates, Inc., a full-service, independent, public opinion and market research firm located in Salt Lake City, Utah, to compile a research study of Salt Lake County residents' attitudes about water quality and watershed preservation issues.

Research Objectives

This research is designed to reveal the following:

- Familiarity with Salt Lake County watershed issues.
- Priorities regarding different watershed attributes.
- Opinions about various actions that affect watershed integrity.
- Land-use priorities.
- Knowledge about the location and water quality of county creeks.
- Attitudes about possible regulatory actions that may affect the watershed.
- Views about Salt Lake County's efforts to protect the watershed.
- Preferences for which funding methods ought to be used for watershed preservation.
- The frequency and types of outdoor recreational use by county residents.
- The importance of outdoor recreation in determining quality of life.
- Sources of information about water quality and environmental issues.

Procedures

Dan Jones & Associates developed the questionnaire in conjunction with representatives from Stantec Consulting and Salt Lake County. To meet the research objectives, 403 individuals were interviewed by telephone from February 12–19, 2007, during evening hours. All interviews

were conducted in the Dan Jones & Associates Data Collection Center, where interviewers are supervised and monitored.

Prior to implementation, the client approved the questionnaire. Before any fieldwork began, the survey instrument was thoroughly pretested on individuals selected at random from the sample universe. The pretest is designed to detect discrepancies that might exist in the instrument in terms of clarity, completeness, level of shared language, and appropriateness of questions. The client approved all changes made to the questionnaire as a result of the pretest.

Sample

Dan Jones & Associates utilized a random sampling procedure, giving each head of household within the sample universe an equal opportunity of being selected for an interview. The margin of error for this survey is $\pm 5.0\%$ for total data. The margin of error increases for the responses of subgroups within the data.

This study has a 95% confidence level, meaning that no more than one time in twenty should chance variations in the sample cause the results to vary by more than the margin of error from the answers that would be obtained if all people in the survey universe were polled.

Because of rounding, response distribution for individual question results may not always total 100%.

Fieldwork

Dan Jones & Associates employs professional, experienced interviewers who have worked on numerous surveys to date and have proven to be reliable, thorough, and able to develop excellent rapport with respondents. Interviewers were cautioned to limit their interaction with respondents concerning individual responses to the questionnaire. To assure consistency in reciting the questions and in recording the responses, the project director carefully briefed each interviewer.

Both structured and unstructured questions were used to measure intensity of opinions and to assess the perceptions of respondents. Demographic questions were asked to provide opinions of subgroups.

Data Analysis

The staff of Dan Jones & Associates prepared statistical results. Each question has a response distribution, as well as a series of demographic cross-tabulations, which organize responses by various groupings and allow for detection of differences that may exist between opinions of subgroups.

SPSS (Statistical Package for Social Science) was used to analyze the data. Statistical tests were conducted to determine if the differences found in the relationships between various populations were real or merely due to chance. Checkmarks highlight statistically significant findings.

Survey results are presented in the Executive Summary and the Charts and Significant Demographics sections of the analysis. Appendices include the full questionnaire with results, all respondent comments, and demographic cross-tabulations for each question.

Executive Summary

Knowledge/Level of Concern

Of the heads of households surveyed in Salt Lake County, two out of three (68%) indicate that they are at least somewhat familiar with concerns about water quality in the streams and rivers of Salt Lake County's watershed (11% *very familiar*, 57% *somewhat familiar*). The remaining third (31%) admit that they are *not at all familiar* with these issues.

Six characteristics or functions of the Salt Lake County watershed were read to respondents, and they were asked to name which one was of the *most value* to them. Greater than half (51%) choose **water quality**, while about one in ten each chose **wildlife habitat** (13%) and **recreation opportunities** (10%).

When asked to rate their level of concern with a series of actions that could potentially be harmful to the Salt Lake County watershed, respondents assert that their greatest concern is **having an adequate supply of good drinking water**, which they give a mean score of 4.76, on a scale of 1/no concern at all to 5/great concern. A close second to this issue is **industrial pollution**, which is given a mean score of 4.61. Two other harmful effects of significant concern (mean score above 4.00) to county residents are: **litter in streams** (4.45) and **loss of fish or wildlife habitat** (4.14).

Water Quality

The next series of questions addressed the respondents' likelihood to agree with various statements about water preservation and water quality issues, using a scale of 1/strongly disagree to 5/strongly agree. The statement with the highest mean score of 4.07 is, "A healthy economy depends on good water quality in the watershed." Addressing the same issue, but phrased in the reverse, the statement, "Sometimes it is okay to lower the water quality in the watershed to promote economic development," receives the lowest mean score of 1.67.

The mean scores for the three remaining statements in this series hover closer to neutral. "Treatment facilities are the best way to address water quality problems," receives greater agreement than the others, with a mean score of 3.42; "Cost should be an important consideration when making decisions about preserving water quality," is rated very near the midpoint of 3.00, at 3.02; and "My recreational activities affect the water quality of the Salt Lake County watershed" receives less agreement, with a mean score of 2.64.

Land-Use Priorities

When considering land-use decisions, Salt Lake County residents express a preference for more of the following (respondents were given the choices of *more*, *about the same*, or *less*; those who select *more* are shown):

- River corridors in their natural condition (52%)
- Wildlife habitat (51%)
- Open space or wetlands (43%)
- Outdoor recreational areas (35%)

Only 7% of residents prefer to see more urban development.

Creek and Rivers in Salt Lake County

Three water systems are relatively well-known among heads of households in the county, while three are not. Ninety-seven percent of respondents say they know where the Jordan River is located, 92% can identify Big Cottonwood Creek's location, and 83% know where to find Emigration Creek. Far fewer can locate Bingham Creek (33%), Dry Creek (23%), or Midas Creek (5%).

After gauging participants' knowledge about the location of waterways in the valley, the survey asked them to rate the quality of the water in those streams and rivers as *good* or *poor*. The Jordan River is believed to have the worst water quality, with the wide majority (76%) of respondents rating it as *poor*. By contrast, an equally large percentage (76%) believes that Big Cottonwood Creek has *good* water quality, and two-thirds (66%) of the respondents think that Emigration Creek has good water quality.. Keeping in mind that the remaining creeks receive a significant number of *don't know* responses, respondents with an opinion about water quality in these creeks are evenly divided between *good* and *poor*. Bingham Creek is believed to have *poor* quality water by 16% of respondents and *good* quality by 11%. Midas Creek is believed to have *poor* quality water by 5% of respondents and *good* quality by 4%.

Regulations

In this section, respondents indicate that they favor policies that generally protect watershed health. The first three questions rely on a scale of 1/strongly oppose to 5/strongly

favor. Fifty-four percent of survey participants confirm that they *strongly favor* the policy, “Require landowners to leave natural vegetation in place near rivers, streams, and wetlands.” The two other policies receive even stronger support: 58% *strongly favor* the policy, “Require a set amount of trees to be planted or not removed for new developments,” and 63% *strongly favor* the policy, “Require new developments set aside natural open space that is free from buildings, parking lots, etc.”

When asked the question, “Do you think Salt Lake County government is doing enough to protect our watershed,” survey participants are evenly split. Forty-six percent agree that it *is* (43% *probably is*, 3% *definitely is*), while 44% divulge they believe it *is not* (33% *probably is not*, 11% *definitely is not*.)

Funding

Opinions vary widely on the sources of funding that should be used to support watershed preservation and water quality. Receiving the highest mean score of 3.82 on a scale of 1/strongly oppose to 5/strongly support, **voluntary contribution** is *strongly supported* by 49% of respondents. **Fees for using the canyons and trails** is also rated highly, with a mean score of 3.59 and 33% of respondents strongly supporting it. About 20% of survey participants *oppose* or *strongly oppose* both of these methods. A third source that receives rather strong support is **bonding for a set amount of money to be used for watershed**, with a mean score of 3.43 and 23% of respondents giving it *strong support*. It, too, is *opposed* or *strongly opposed* by 20% of respondents.

Approximately equal numbers of respondents oppose and favor using **a fee added to sewer and water charges**, which has a mean score of 2.93. More opposition is expressed over the two tax increases. **A small property tax increase** is given a mean score of 2.63, and **a small sales tax increase** receives an even lower mean score of 2.39.

Recreation

Respondents were probed for how frequently they participate in seven outdoor activities. The activities in which the most people participate are **hiking or walking** (84% participate in this activity at least 1–2 times a year) and **camping or picnicking** (80%). Roughly equal numbers of respondents participate in **biking** (45%) or **bird or nature observation** (49%), and they participate in these activities with very similar frequency.

Hiking and walking also has the most frequent participation of all activities, with one out of five (21%) respondents participating in this activity at least weekly. About one in eight respondents participates in **biking** (12%) and **bird or nature observation** (13%) at least weekly.

Hiking and walking remains the most popular activity that respondents participate in at least monthly, with a participation rate of 33%. However, nearly as many people participate in **camping or picnicking** at least monthly (26%), and of the activities in which survey-takers participate at least yearly, **camping or picnicking** is the most popular, with nearly half (48%) of all respondents participating with this frequency.

About one in three (30%) survey participants indicate that they engage in **other outdoor recreational activities** in the Salt Lake area not listed in the survey. These specific activities are included in the respondent comments section of this report (Appendix B).

Three out of four (74%) Salt Lake County heads of household report using the creek and river trails in the county area. One out of ten (10%) respondents affirm that they use the trails at least weekly (8% weekly, 2% daily).

Survey participants reveal that they drive varying distances to participate in their favorite outdoor leisure activities. More than one in four (27%) participants finds their favorite activities within 6 miles of their home. Nearly a third (30%) drives between 6–20 miles, while about one in six each drives between 21–50 miles (16%) and over 50 miles (18%) to reach their favorite activities.

Finally, respondents disclose that outdoor leisure and recreational activities are very important to their overall quality of life. About two-thirds (64%) argue that these activities are *very important*, and an additional 30% state they are *somewhat important*. For one in twenty, they are *not too important* (4%) or *not at all important* (1%).

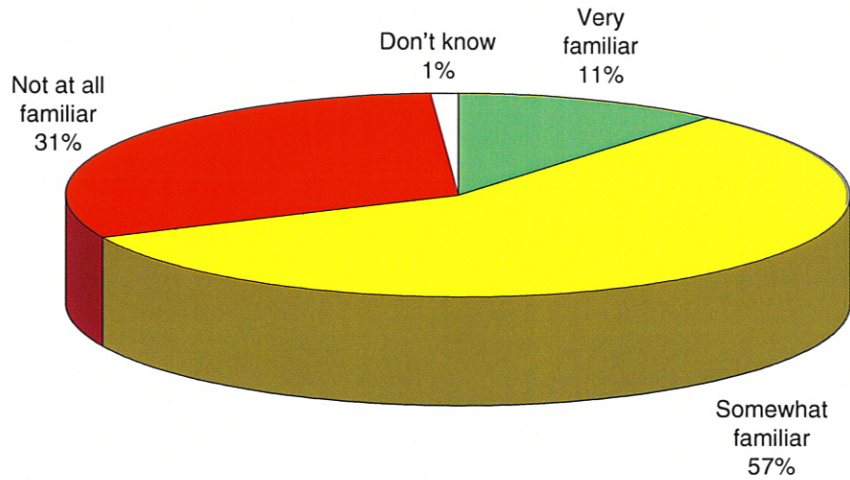

Information

To gather news and information about water quality and environmental issues, about one-third of respondents each report that they turn to the **local newspaper** (37%) or the **television** (31%). Another 8% rely on **local radio**, while 9% say they get that information through the **Internet**. **Other sources** provide information to 14% of respondents; many of these

include word-of-mouth sources. All these comments are detailed in the respondent comments section (Appendix B).

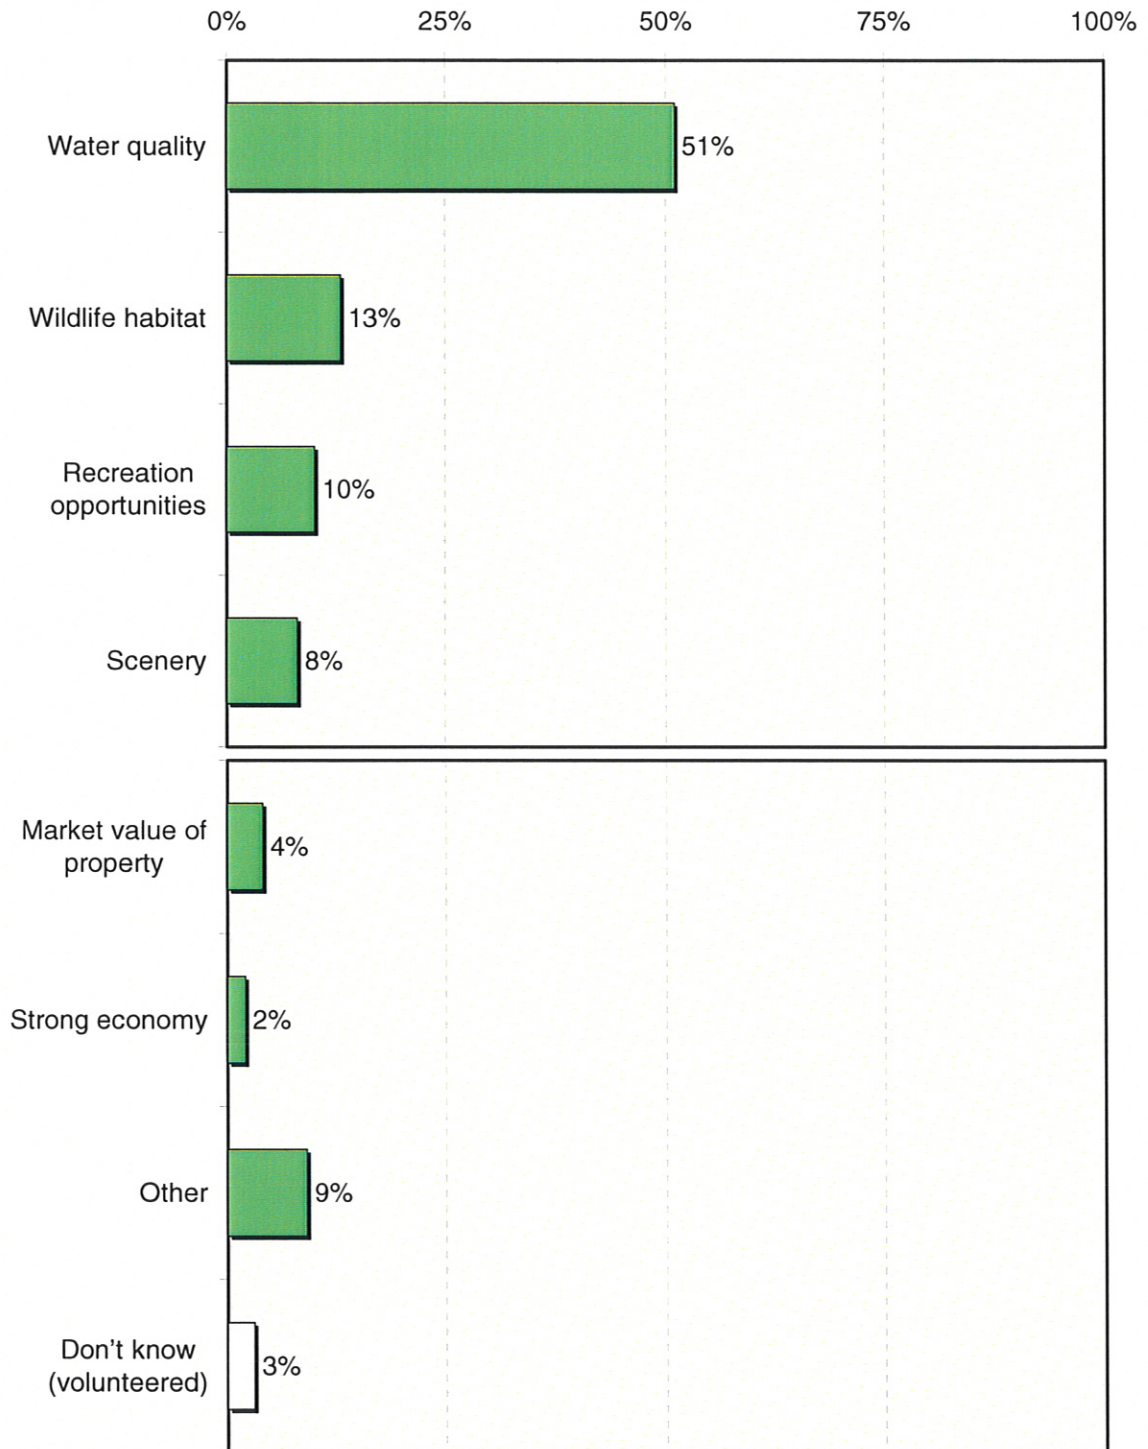

Charts and Significant Demographics

Question 1: Are you familiar with water quality concerns in our streams and rivers in Salt Lake County?

- ✓ Males, older residents, and those who have lived in the Salt Lake area for over 10 years are more likely to be familiar with water quality concerns in Salt Lake County's streams and rivers.
- ✓ Respondents who indicate that they are politically moderate are more likely to say they are *not* familiar with water quality concerns in Salt Lake County's streams and rivers.

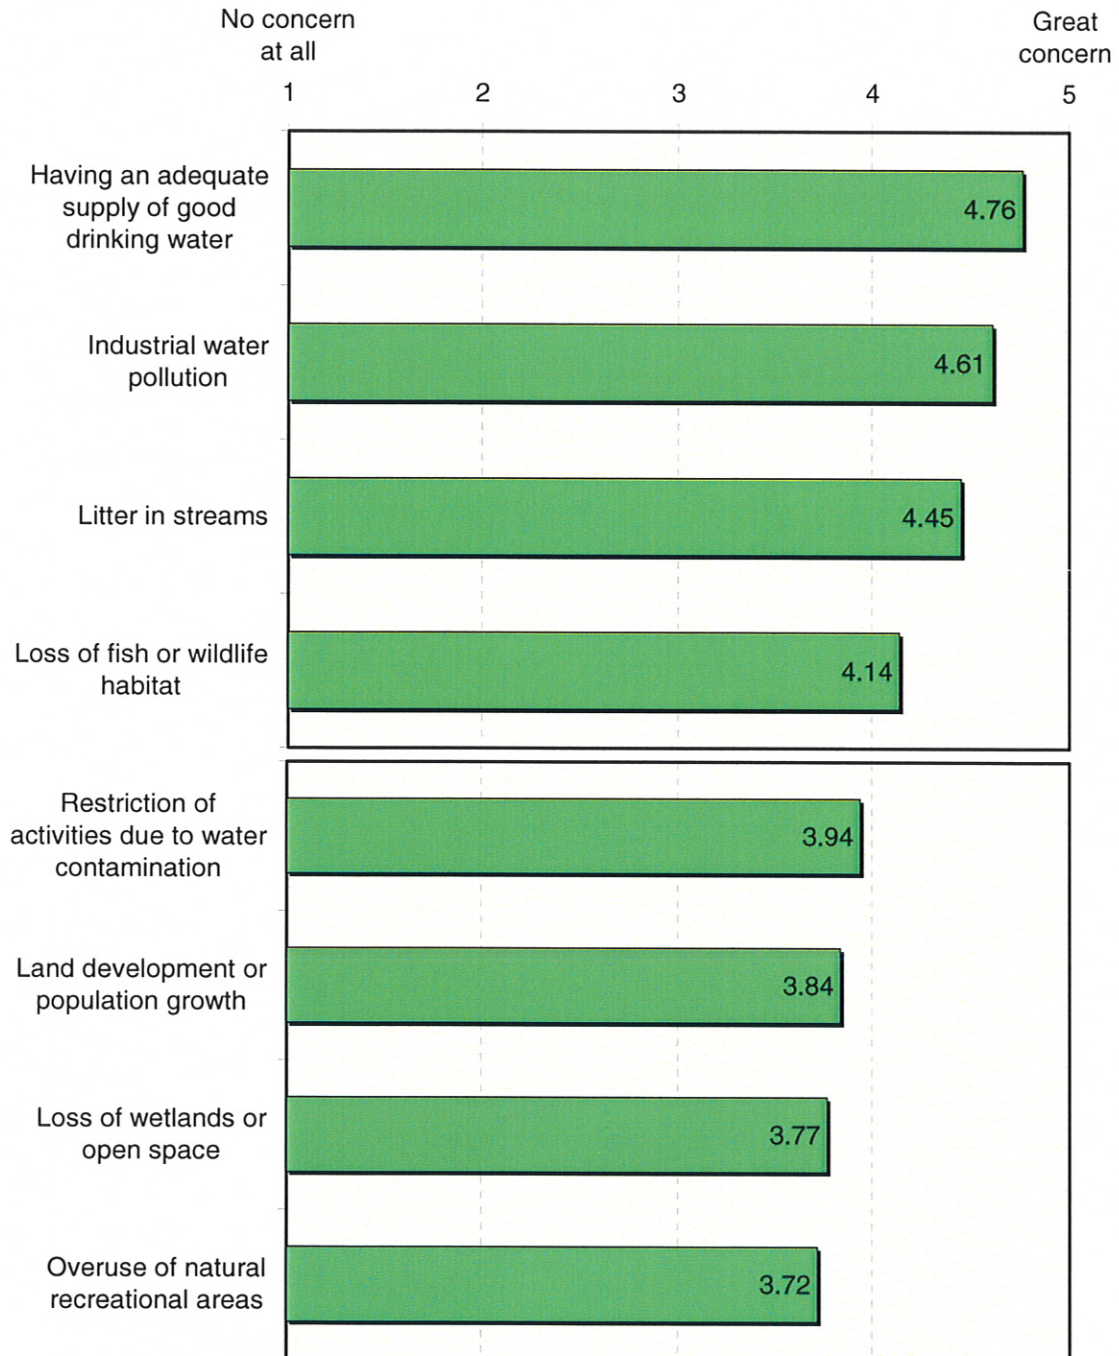

Question 2: What do you most value in the Salt Lake County watershed?

A complete list of responses is found in Respondent Comments, Appendix B.

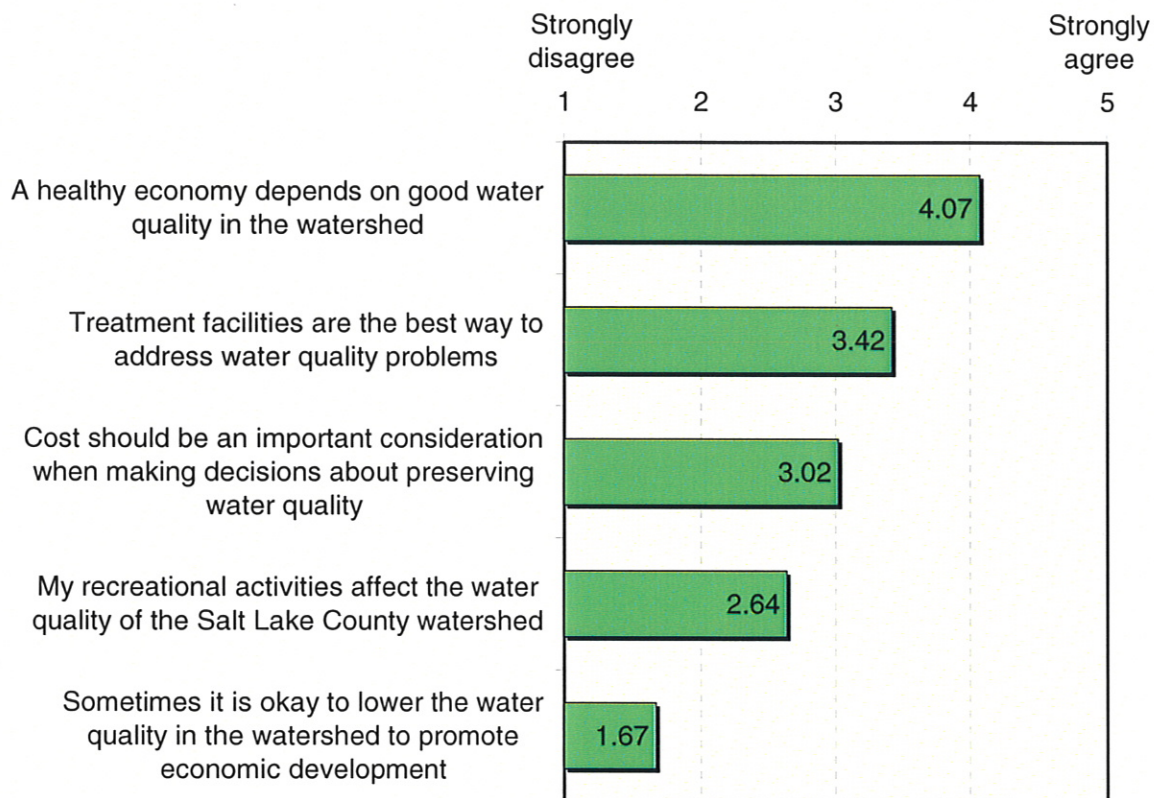

- ✓ Residents whose annual family income is less than \$100,000 are more likely to say they most value **water quality** in the Salt Lake County watershed.
- ✓ Respondents whose annual family income is under \$35,000 are more likely to say they most value **wildlife habitat** in the Salt Lake County watershed.
- ✓ Younger residents and those whose annual family income is over \$100,000 are more likely to say they most value the **scenery** and **recreation opportunities** in the Salt Lake County watershed.

Questions 3–10: As I read a list of potential issues facing the Salt Lake County watershed, please rate your concern about each using a 1–5 scale, with one meaning it’s of “no concern at all” and five meaning it is of “great concern.”

- ✓ Residents age 55 and over and those whose educational attainment is high school or less are more likely to say they are greatly concerned (a “5” rating) about the **restriction of activities due to water contamination.**
- ✓ Females and those who say they are either politically somewhat liberal or very liberal are more likely to say they are greatly concerned about the **loss of wetlands or open space.**
- ✓ Older residents and those whose political ideology is somewhat liberal or very liberal are more likely to say they are greatly concerned about the **overuse of natural recreational areas in the valley.**
- ✓ Respondents who are either politically somewhat liberal or very liberal are more likely to say they are greatly concerned about **land development or population growth.**

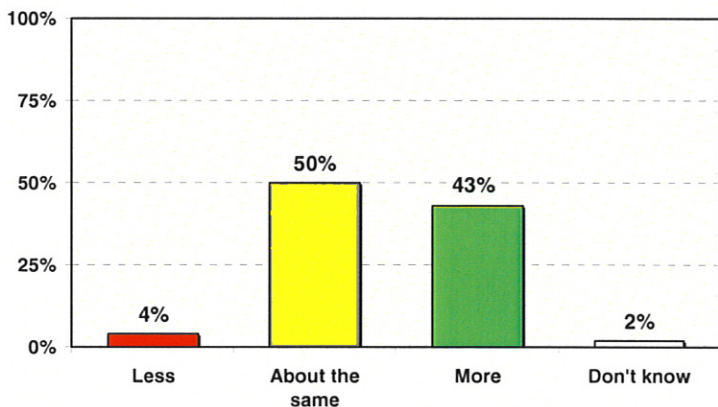

Questions 11–15: Using a 1–5 scale, this time with one meaning you “strongly disagree” and five meaning you “strongly agree,” please tell me whether you agree or disagree with the following statements:

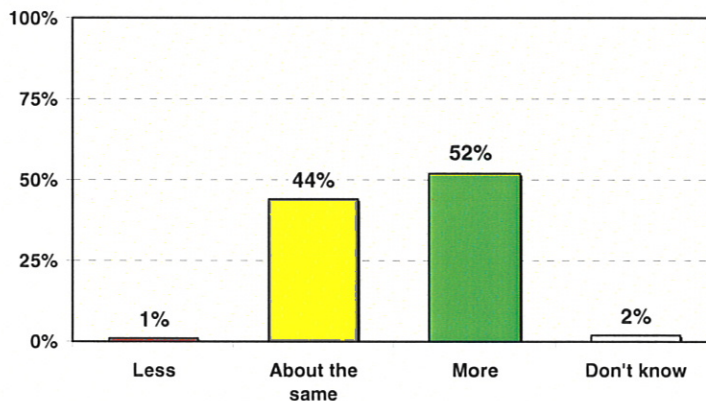

- ✓ Respondents who are either politically somewhat liberal or very liberal are more likely to say they *disagree or strongly disagree* that **cost should be an important consideration when making decisions about preserving water quality.**
- ✓ Residents over age 65 are more likely to say they *strongly agree* (a “5” rating) that **a healthy economy depends on good water quality in the watershed.**
- ✓ Residents over age 65, those with lower educational attainment, and those with a lower annual family income are more likely to say they *strongly agree* that **treatment facilities are the best way to address water quality problems.**

Questions 16–20: Within a watershed there can be a number of land uses. For each of the following, please tell me whether you would like to see less, more, or about the same of each in Salt Lake County.

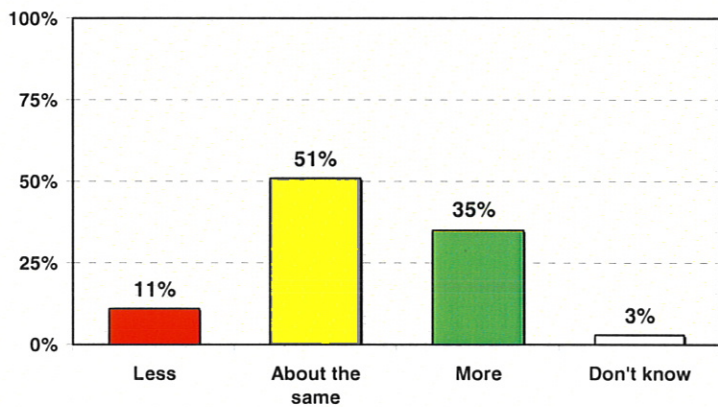

Open space or wetlands

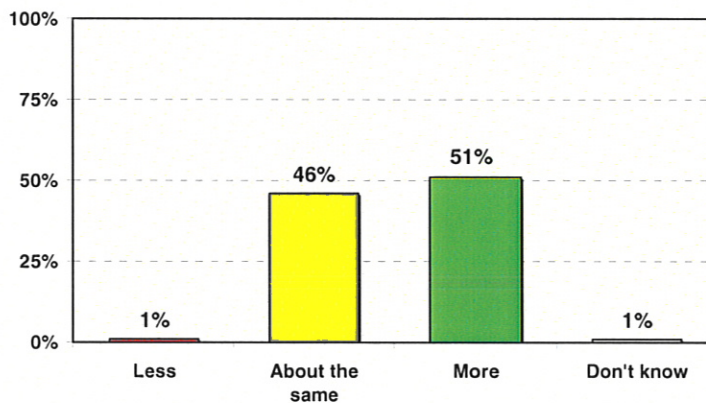

River corridors in their natural condition

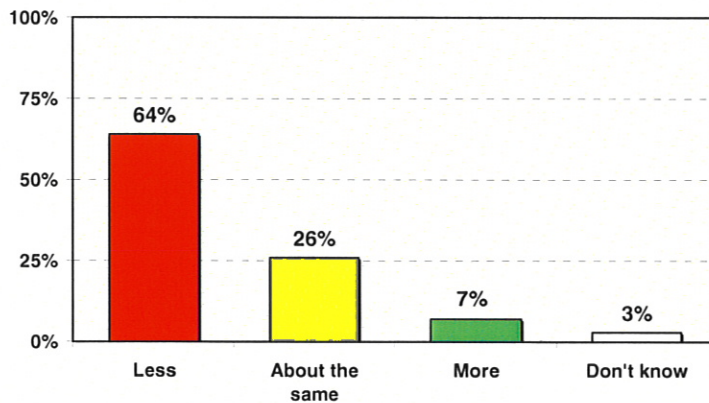

Outdoor recreational areas

Wildlife habitat

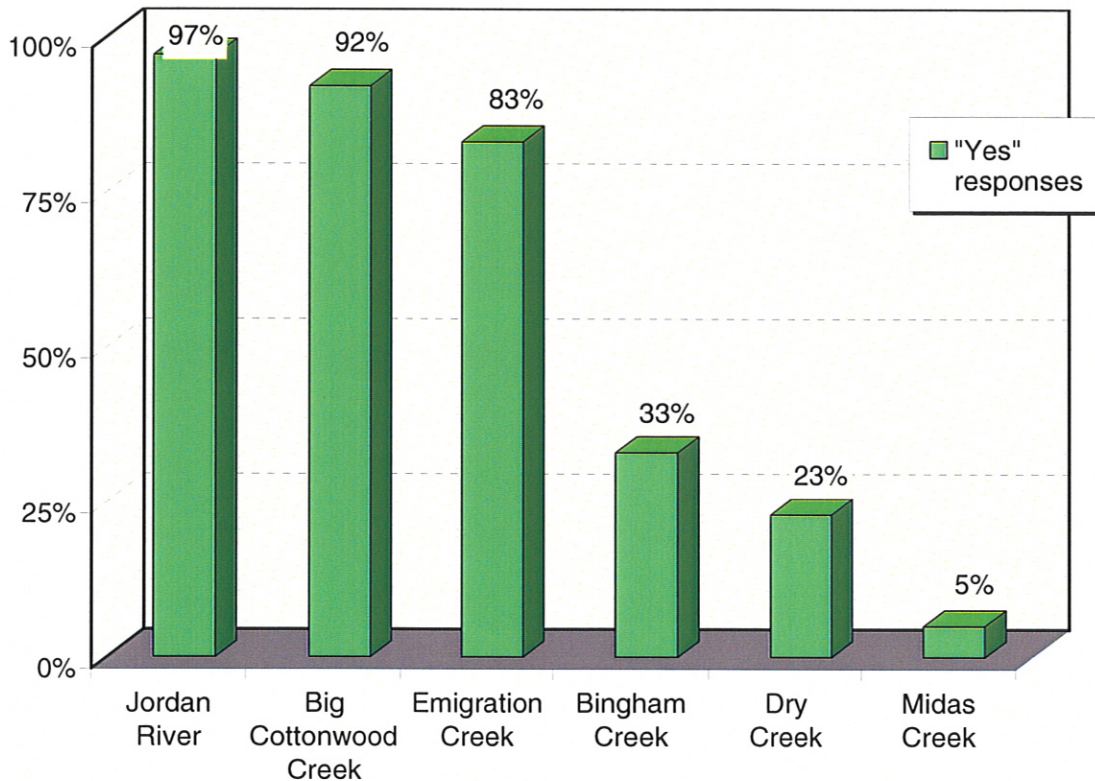

Urban development

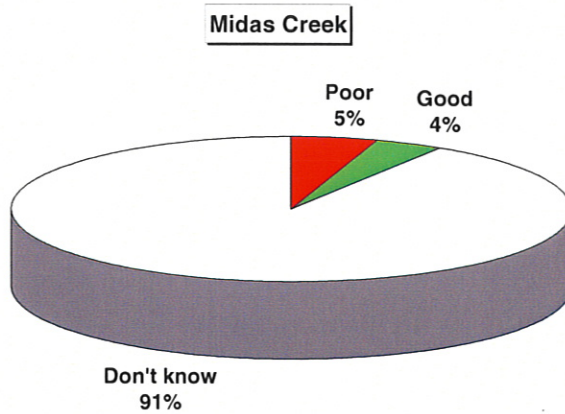

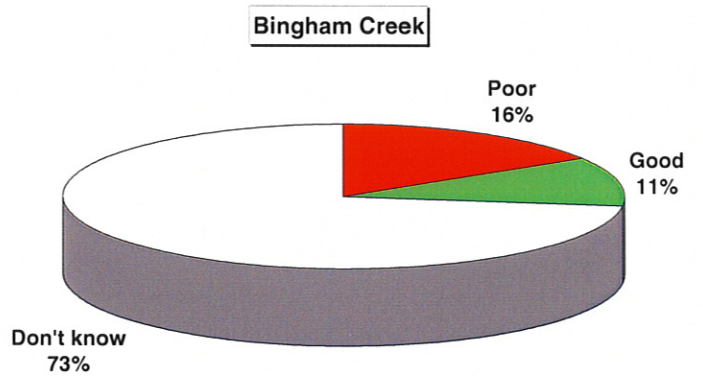

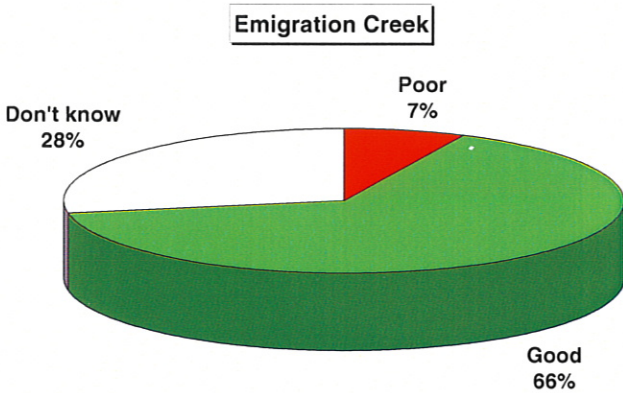

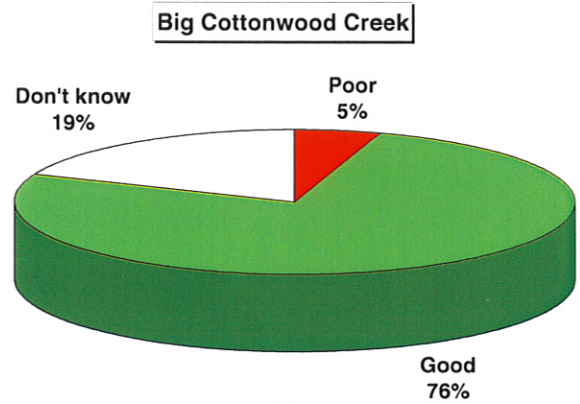

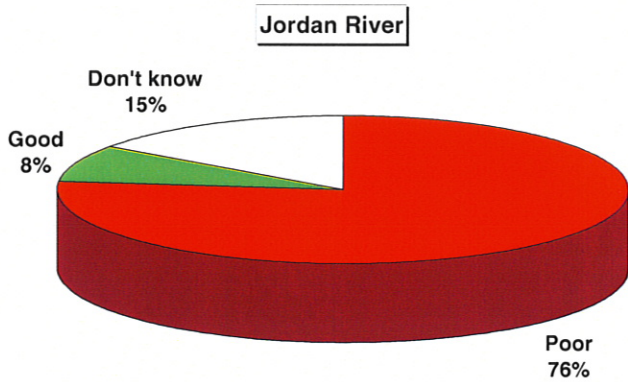

- ✓ Respondents with a post-college education and those whose political ideology is somewhat liberal or very liberal are more likely to say they would like to see more **open space or wetlands**.
- ✓ Residents whose political ideology is somewhat liberal or very liberal and those whose annual family income is between \$35,000–\$59,999 are more likely to say they would like to see more **river corridors in their natural condition**.
- ✓ Residents whose political ideology is somewhat liberal or very liberal are more likely to say they would like to see more **wildlife habitat**.
- ✓ Residents whose political ideology is somewhat liberal or very liberal and those between the ages of 45–54 are more likely to say they would like to see *less* **urban development**.
- ✓ Residents whose political ideology is somewhat conservative or very conservative and those between the ages of 55–64 are more likely to say they would like to see *about the same* amount of **urban development**.

Questions 21–26: Do you happen to know where the following are located in the valley?

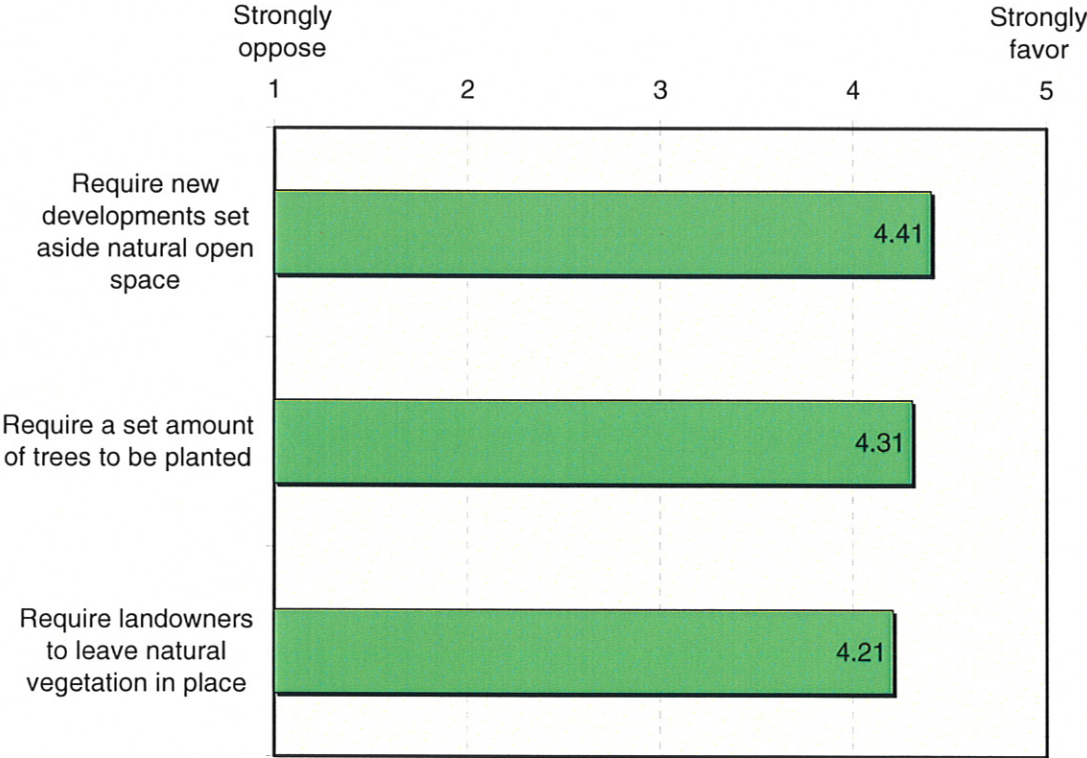

- ✓ Males, those whose educational attainment is above high school, those with a higher annual family income, those who own rather than rent their residence, and those who have lived in the Salt Lake area for over 10 years are more likely to say they know where Emigration Creek is located.
- ✓ Males are more likely to say they know where Bingham Creek is located.
- ✓ Residents over the age of 65, those whose political ideology is very conservative, and those who have lived in the Salt Lake area for 10 or fewer years are more likely to say they *do not* know where Dry Creek is located.

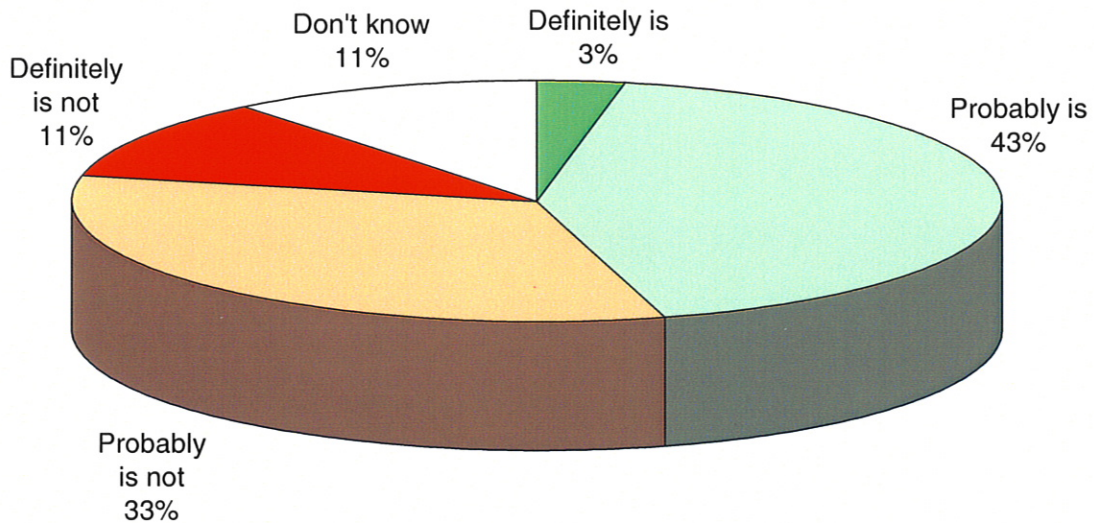

Questions 27–31: And from what you know or have heard, would you say the water quality is poor or good in the following creeks?

Questions 32–34: Please tell me whether you would favor or oppose adopting the following regulations in Salt Lake County that impact water quality and watershed health; this is using a 1–5 scale, with one meaning you would “strongly oppose” and five meaning “strongly favor.”

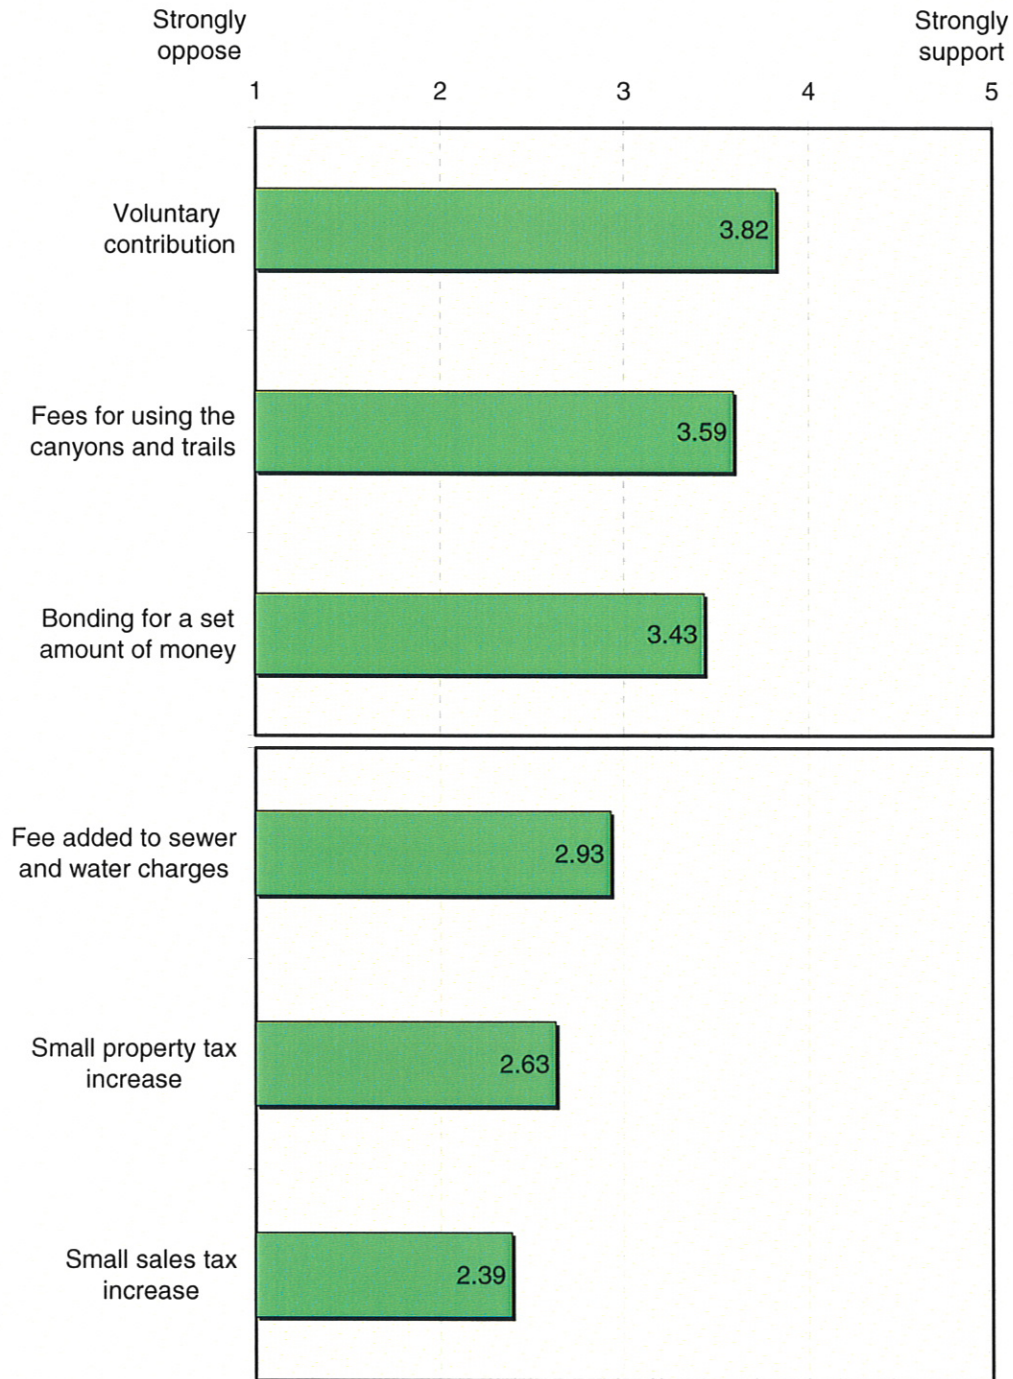

Question 35: Do you think Salt Lake County government is doing enough to protect our watershed?

- ✓ Respondents with some college or technical school training, those whose political ideology is more conservative, those with an annual family income between \$60,000–\$100,000, and those who own their residence are more likely to say that Salt Lake County government *is* doing enough to protect our watershed.
- ✓ Respondents with a post-college education, those whose political ideology is somewhat liberal or very liberal, those whose annual family income is less than \$35,000 or more than \$100,000, and those who rent their residence are more likely to say that Salt Lake County government *is not* doing enough to protect our watershed.

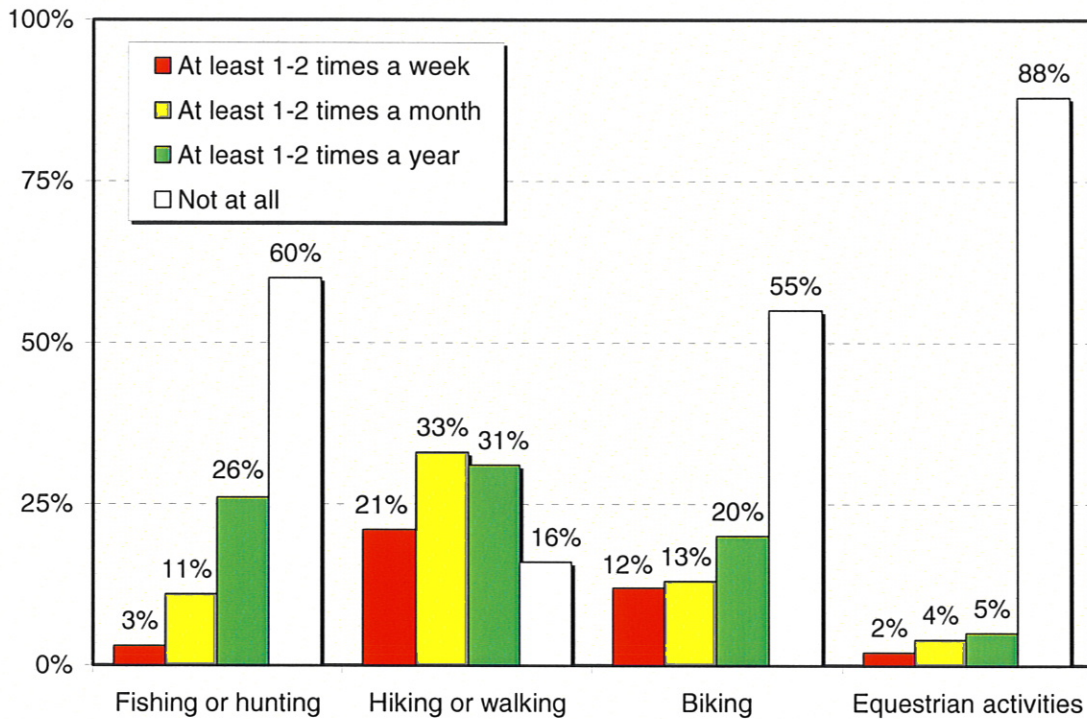

Questions 3641: Please rate whether you favor or oppose using the following sources of funding for water quality and protection using a 1–5 scale, with one meaning you “strongly oppose” and five meaning you “strongly support” the funding mechanism.

Females are more likely to say they *support* **fees for using the canyons and trails** as a way to pay for water quality and protection.

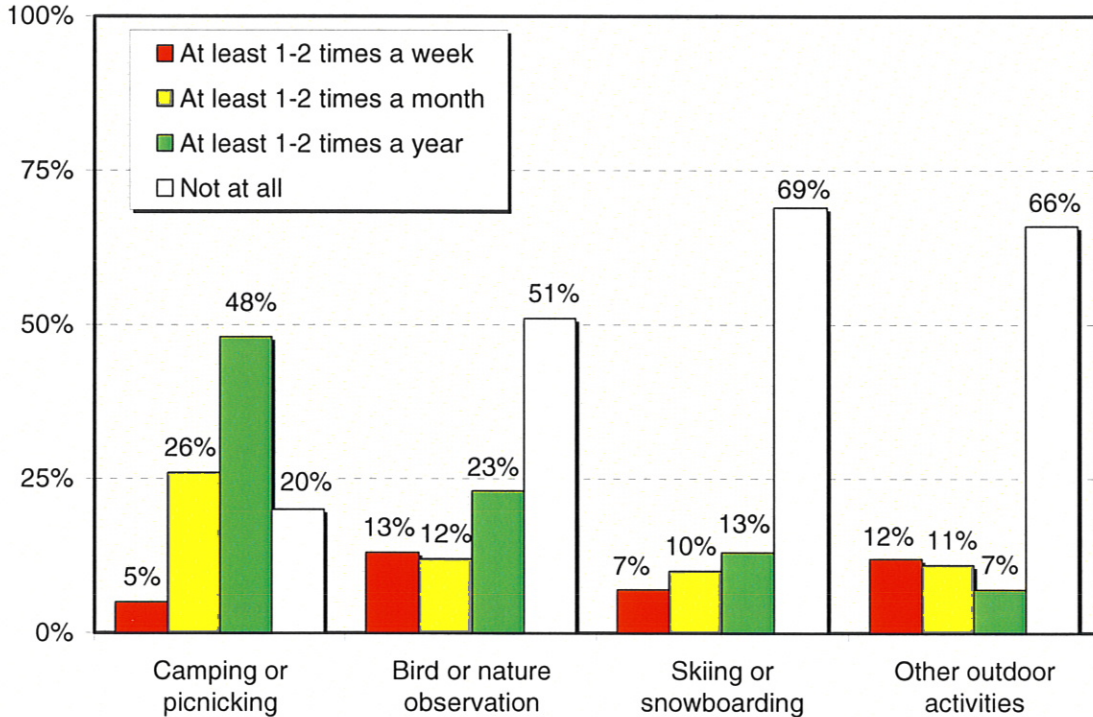

- ✓ Younger respondents are more likely to say they *support* a **voluntary contribution** as a way to pay for water quality and protection.
- ✓ Older respondents, those with lower educational attainment, those who are politically more conservative, and those who have a lower annual family income are more likely to *oppose* a **fee added to sewer and water charges** as a way to pay for water quality and protection.
- ✓ Males, those with lower educational attainment, those whose political ideology is more conservative, and those with a higher annual family income are more likely to *oppose* a **small property tax increase** as a way to pay for water quality and protection.
- ✓ Older respondents are more likely to *oppose* a **small sales tax increase** as a way to pay for water quality and protection.

Questions 42–45: On average, how often do you participate in the following recreational activities within the Salt Lake County area?

- ✓ Males and younger respondents are more likely to say they go **fishing or hunting** more frequently.
- ✓ Younger respondents, those with higher educational attainment, those with a higher annual family income, and those who have lived in the Salt Lake area for *fewer* years are more likely to say they go **hiking or walking** more frequently.
- ✓ Younger respondents, those with higher educational attainment, those with a higher annual family income, and those who have lived in the Salt Lake area for *fewer* years are more likely to say they go **biking** more frequently.

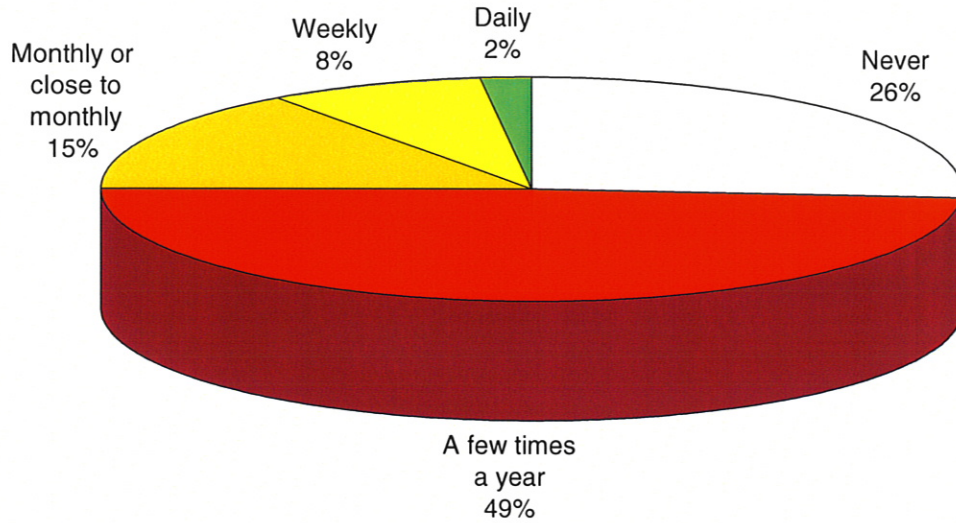

Questions 46–49: On average, how often do you participate in the following recreational activities within the Salt Lake County area? (Q.49: Do you participate in any other outdoor recreational activities in the Salt Lake area?)

A complete list of responses is found in Respondent Comments, Appendix B.

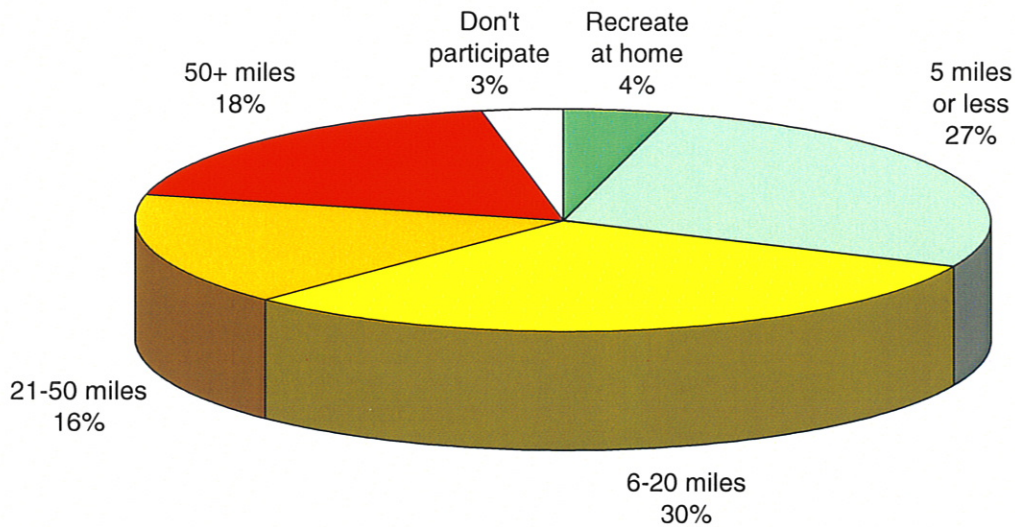

- ✓ Males and younger respondents are more likely to say they go **camping** more frequently
- ✓ Respondents whose educational attainment is high school or less or some college/technical school are more likely to say they *do not* participate in **bird or nature watching**.
- ✓ Younger respondents, those with higher educational attainment, those who are more liberal in their political views, and those who have a higher annual family income are more likely to say they go **snow skiing or snowboarding** more frequently.

Question 50: How often do you use the creek and river trails in the Salt Lake County area?

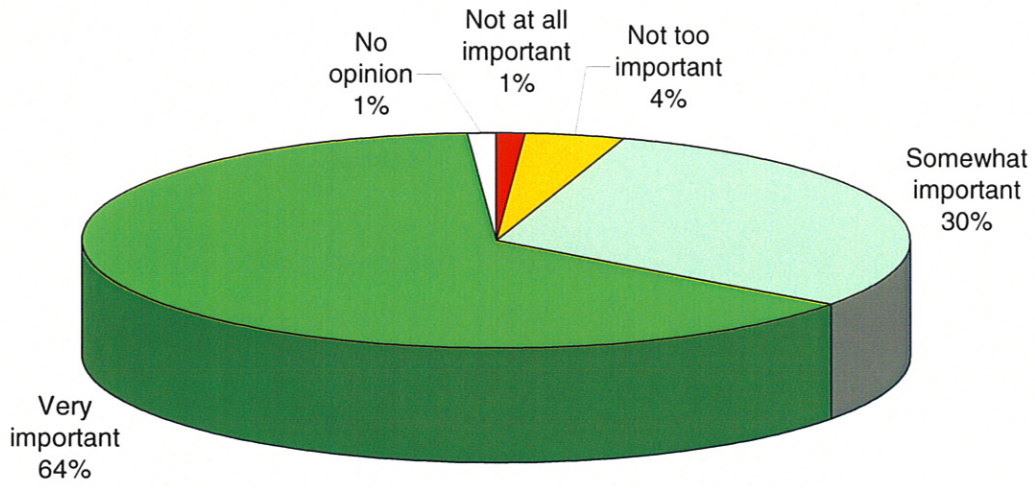

- ✓ Younger respondents, those with higher educational attainment, and those who have a higher annual family income are more likely to say they use the creek and river trails in the Salt Lake County area.

Question 51: What is the average distance you drive to participate in your favorite outdoor leisure activities?

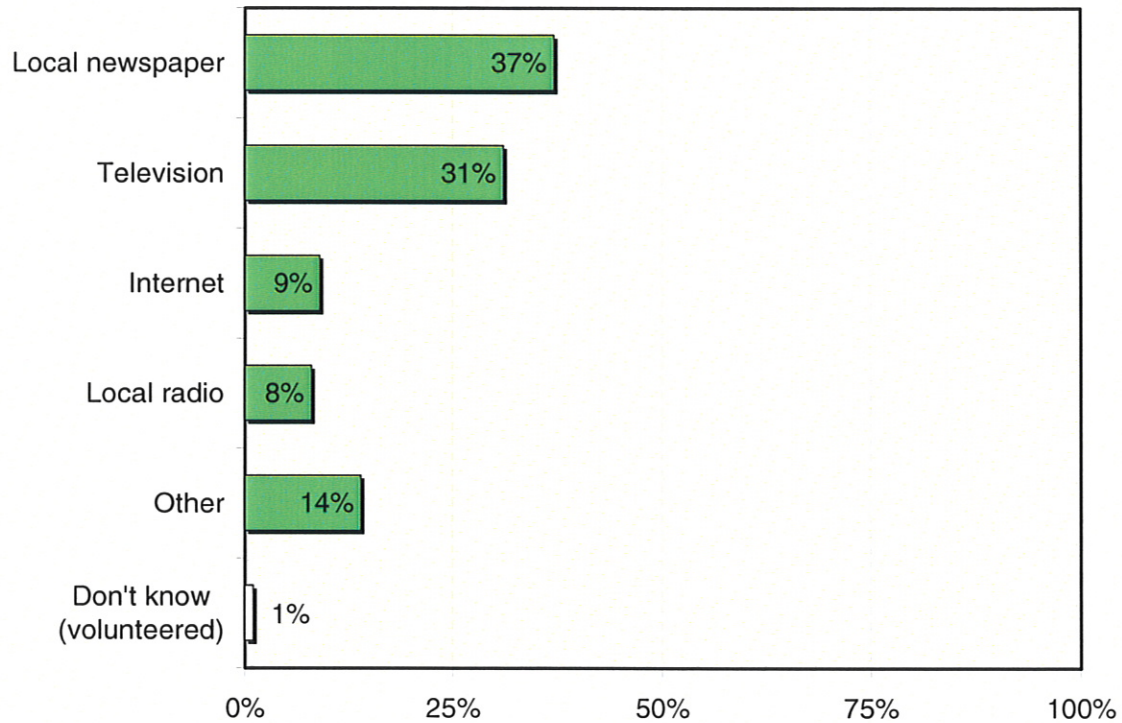

- ✓ Respondents whose annual family income is more than \$100,000 are more likely to say they travel an average of **5 miles or less** to participate in their favorite outdoor leisure activities.
- ✓ Respondents whose annual family income is between \$35,000–\$59,999 are more likely to say they travel an average of **6–10 miles** to participate in their favorite outdoor leisure activities.

Question 52: How would you rate the importance of outdoor leisure and recreational activities to your overall quality of life (overall satisfaction and happiness)?

Question 53: What is your main source of news and information about water quality and environmental issues?

A complete list of responses is found in Respondent Comments, Appendix B.

- ✓ Older respondents and those who have lived in the Salt Lake area for a longer period of time are more likely to say their main source of news and information about water quality and environmental issues is the **local newspaper**.
- ✓ Respondents between the ages of 35–44 are more likely to say their main source of news and information about water quality and environmental issues is the **television**.

Questionnaire with Results

Hello. I'm _____ with Dan Jones & Associates. We are conducting a survey of county residents regarding water quality issues. May I speak with one of the heads of the household? May I ask you some questions on these local issues?

Knowledge / Level of Concern

1. Are you familiar with water quality concerns in our streams and rivers in Salt Lake County?

Very familiar	11%
Somewhat familiar	57%
Not at all familiar	31%
Don't know (DO NOT READ)	1%

2. What do you most value in the Salt Lake County watershed? (READ OPTIONS – ROTATE)

Scenery	8%
Recreation opportunities	10%
Wildlife habitat	13%
Strong economy	2%
Market value of property	4%
Water quality	51%
Other? (SPECIFY)	9%
Don't know (DO NOT READ)	3%

A complete list of responses is found in Respondent Comments, Appendix B.

As I read a list of potential issues facing the Salt Lake County watershed, please rate your concern about each - using a 1-5 scale, with one meaning it's of "No concern at all" and five meaning it is of "great concern."

	No concern <u>at all</u>			Great <u>concern</u>		Don't <u>know</u>	<u>Mean</u>
3. Having an adequate supply of good drinking water	2%	1%	3%	8%	86%	0%	4.76
4. Litter in streams	2%	2%	10%	19%	66%	1%	4.45
5. Loss of fish or wildlife habitat	2%	2%	19%	30%	45%	1%	4.14
6. Restriction of activities due to water contamination	5%	9%	19%	18%	47%	2%	3.94
7. Loss of wetlands or open space	4%	10%	25%	28%	33%	1%	3.77
8. Overuse of natural recreational areas in the valley	4%	11%	24%	28%	32%	1%	3.72
9. Land development or population growth	5%	6%	26%	26%	36%	1%	3.84
10. Industrial water pollution	1%	1%	8%	13%	75%	1%	4.61

Water Quality

Using a 1-5 scale, this time with one meaning you “strongly disagree” and five meaning you “strongly agree”, please tell me whether you agree or disagree with the following statements.

	<u>Strongly disagree</u>			<u>Strongly agree</u>		<u>Don't know</u>	<u>Mean</u>
11. Sometimes it is okay to lower the water quality in the watershed to promote economic development.	65%	16%	10%	4%	5%	1%	1.67
12. Cost should be an important consideration when making decisions about preserving water quality.	18%	16%	28%	20%	17%	1%	3.02
13. A healthy economy depends on good water quality in the watershed.	8%	5%	10%	24%	52%	1%	4.07
14. Treatment facilities are the best way to address water quality problems.	4%	12%	35%	20%	20%	8%	3.42
15. My recreational activities affect the water quality of the Salt Lake County watershed.	31%	15%	23%	13%	14%	3%	2.64

Land-Use Priorities

Within a watershed there can be a number of land uses. For each of the following, please tell me whether you would like to see less, more, or about the same of each in Salt Lake County.

	<u>Less</u>	<u>About the same</u>	<u>More</u>	<u>Don't know</u>
16. Open space or wetlands	4%	50%	43%	2%
17. River corridors in their natural condition	1%	44%	52%	2%
18. Outdoor recreational areas	11%	51%	35%	3%
19. Wildlife habitat	1%	46%	51%	1%
20. Urban development	64%	26%	7%	3%

Creeks and Rivers

21-26. Do you happen to know where the following are located in the valley?

	<u>Yes</u>	<u>No</u>
Jordan River	97%	3%
Big Cottonwood Creek	92%	8%
Emigration Creek	83%	17%
Bingham Creek	33%	66%
Midas Creek	5%	94%
Dry Creek	23%	76%

And from what you know or have heard, would you say the water quality is poor or good in the following creeks?

	<u>Poor quality</u>	<u>Good quality</u>	<u>Don't know</u>
27. Jordan River	76%	8%	15%
28. Big Cottonwood Creek	5%	76%	19%
29. Emigration Creek	7%	66%	28%
30. Bingham Creek	16%	11%	73%
31. Midas Creek	5%	4%	91%

Regulations

Please tell me whether you would favor or oppose adopting the following regulations in Salt Lake County that impact water quality and watershed health – this is using a 1-5 scale, with one meaning you would “strongly oppose” and five meaning “strongly favor.”

	<u>Strongly oppose</u>	<u>Neutral</u>	<u>Strongly favor</u>	<u>Don't know</u>	<u>Mean</u>		
32. Require landowners to leave natural vegetation in place near rivers, streams and wetlands.	3%	4%	15%	22%	54%	1%	4.21
33. Require a set amount of trees to be planted or not removed for new developments.	3%	3%	13%	23%	58%	1%	4.31
34. Require new developments to set aside natural open space that is free from buildings, parking lots, etc.	2%	2%	10%	22%	63%	1%	4.41

35. Do you think Salt Lake County government is doing enough to protect our watershed?

Definitely is	3%
Probably is	43%
Probably is not	33%
Definitely is not	11%
Don't know (DO NOT READ)	11%

Funding

Please rate whether you favor or oppose using the following sources of funding for water quality and protection – using a 1-5 scale, with one meaning you “strongly oppose” and five meaning you “strongly support” the funding mechanism.

	<u>Strongly oppose</u>	<u>Neutral</u>	<u>Strongly support</u>	<u>Don't know</u>	<u>Mean</u>		
36. Fees for using the canyons & trails	11%	9%	23%	23%	33%	1%	3.59
37. A small property tax increase	31%	15%	24%	17%	12%	1%	2.63
38. A small sales tax increase	38%	17%	22%	14%	9%	1%	2.39

47. Bird or nature observation	13%	12%	23%	51%	1%
48. Snow skiing or snowboarding	7%	10%	13%	69%	1%

49. Do you participate in any other outdoor recreational activities in the Salt Lake area? (SPECIFY)

	At least 1-2 times <u>a week</u>	At least 1-2 times <u>a month</u>	At least 1-2 times <u>a year</u>	Not <u>at all</u>	Don't <u>know</u>
	12%	11%	7%	66%	4%

A complete list of responses is found in Respondent Comments, Appendix B.

50. How often do you use the creek and river trails in the Salt Lake County area? (READ OPTIONS)

Never	26%
A few times a year	49%
Monthly or close to monthly	15%
Weekly	8%
Daily	2%
Don't know / refuse (DO NOT READ)	0%

51. What is the average distance you drive to participate in your favorite outdoor leisure activities?

5 miles or less	27%
6-20 miles	30%
21-50 miles	16%
Over 50 miles	18%
Recreate at home	4%
Depends (DO NOT READ)	2%
Don't participate (DO NOT READ)	3%

52. How would you rate the importance of outdoor leisure and recreational activities to your overall quality of life (overall satisfaction and happiness)?

Not at all important	1%
Not too important	4%
Somewhat important	30%
Very important	64%
No opinion	1%

Information

53. What is your main source of news and information about water quality and environmental issues?

Local newspaper	37%
Television	31%
Local radio	8%
Internet	9%
Other (SPECIFY)	14%
Don't know (DO NOT READ)	1%

Demographics

54. Gender (DO NOT ASK)

Male	50%
Female	50%

55. What is your age category?

18-24	2%
25-34	16%
35-44	22%
45-54	23%
55-64	18%
65 and older	18%
Refuse (DO NOT READ)	1%

56. What is your ethnic background?

White / Caucasian	91%
Hispanic / Latino	1%
Black / African American	0%
Native American / American Indian	1%
Asian	2%
Pacific Islander	0%
Other	2%
Refuse (DO NOT READ)	2%

57. What is the last level of education you've completed?

Some high school	1%
High school graduate	19%
Some college / technical	31%
College graduate	34%
Post-college graduate	13%
Refuse (DO NOT READ)	2%

58. Politically speaking, are you...?

Very liberal	7%
Somewhat liberal	17%
Moderate	26%
Somewhat conservative	27%
Very conservative	17%
Don't know (DO NOT READ)	3%
Refuse (DO NOT READ)	3%

59. Is your approximate annual family income category...(READ OPTIONS)?

Under \$20,000	6%
\$20,000 - \$34,999	11%
\$35,000 - \$59,999	24%
\$60,000 - \$100,000	26%
Over \$100,000	23%
Refuse (DO NOT READ)	10%

60. Do you own or rent your residence?

Own / buying	87%
Rent	9%
Other (SPECIFY)	1%
Refuse (DO NOT READ)	3%

61. How long have you lived in the Salt Lake area?

Less than 2 years	3%
2-5 years	4%
6-10 years	7%
Over 10 years	84%
Refuse (DO NOT READ)	2%

62. What is your zip code?

8 4 _____

Question 2: What do you most value in the Salt Lake County watershed? (Other-specify)

All but the market value. (2)

All of the above. (14)

Don't know. (6)

Drinking water.

Having it, being able to drink it.

Irrigation water.

Quality of life.

Recreation, scenery, and water quality.

Recreation and wild life habitat.

Scenery and the Recreational value.

Scenery, Water quality and recreation opportunities.

Scenery, water quality, campgrounds around.

Something else.

That we keep the water here in Utah, and not give it all to California.

The water quality and wild life and scenery.

The way they are using the property around the reservoirs. Deer Creek in particular--this is concerning that reservoir--Jordanelle.

Water quality and wildlife habitat.

Water quality, scenery, pristine wildlife.

Water quality, environmental.

Weather.

Wild life and water.

Wild life.

Question 49: Do you participate in any other outdoor recreational activities in the Salt Lake area? (SPECIFY)

4-wheeling. (4)

ATV riding. (2)

Backpacking--twice a month.

Baseball and swimming.

Baseball in the summer.

Boating. (6)

Boating and it is at least 12 times a year.

Boating and such in the summer time.

Boating and water skiing.

Boating, hunting.

Camping.

Canoeing and snowshoeing.

Canoeing on the Jordan River.

Drive around and look at things.

Drives to see scenic areas.

Duck hunting.

Football games.

Gardening.

Gardening, stuff like that.

Going to the park. (6)

Going to the zoo. Visiting county rec facilities at least once a week.

Golf. (25)

Golf, tennis etc.

Hiking.

Kayaking.

Kayaking/canoeing in summer-twice a month.

Kids' soccer games.

Motorcycling.

Mountain biking.

Nature walking.

No comment.

No.

Off-road vehicles.

Once a month.

Outdoor sports.

Parks, rollerblading on the Jordan River path.

Racing motorcycles.

Question 49: Do you participate in any other outdoor recreational activities in the Salt Lake area? (SPECIFY)

Rock climbing. (6)

Rollerblading.

Rowing.

Running. (2)

Shooting at ranges and clubs.

Skateboarding.

Sledding.

Snowmobiling and boating.

Snowmobiling. (2)

Soccer. (2)

Softball.

Softball, baseball, soccer.

Sports.

Sports spectator.

Swimming.

Swimming, tennis, and running.

Take my dogs to the park.

Take my kids to the park and up to Pineview.

Taking my kids to the park.

Target shooting-once every two months.

Tennis player and gardener.

Tennis. (2)

Trap shooting. (2)

Wakeboarding. (2)

Walking the dog.

Walking, mowing a lawn, and sports activities.

Walking. (2)

Water skiing. (3)

We go to the lake.

Question 53: *What is your main source of news and information about water quality and environmental issues? (Other-specify)*

A letter.

All but the Internet.

All of the above. (6)

Bill insert from water company. (4)

Books.

County records.

Father.

Friends and co-workers.

Holladay Water Company.

I have a neighbor who's on the state water conservancy district board.

I hear about it at college.

I'm on the water board of Pine Meadows. I was also on heavily involved with the Central Utah Project. My most-used source is government newsletters.

Info from the water company.

Internet and newspaper.

Local government of community meeting.

Local water board.

Mail.

Mailed pamphlets from Holladay Water.

My employment.

My friend is the former EPA Director of Utah.

My husband. (2)

My local irrigation and water company.

News and Internet.

Newspaper and TV. (2)

News.

Newsletter.

Newspaper, radio and Internet.

Newspaper, TV, and radio.

Plumber by trade.

Professional journals, personal networks.

Radio and TV. (2)

Save Our Canyons newsletter.

Self-observation.

Teachers.

The Riverton City Newsletter.

Question 53: *What is your main source of news and information about water quality and environmental issues? (Other-specify)*

Tie between Internet, news and television.

TV, radio, and newspapers.

Utah Division of Natural Resources Reports.

Water newsletter.

Water quality report once a year.

What I hear on the news or what I read in magazines.

When I used to work next to the water facilities; then I had tons of information.

Word of mouth.

Word of mouth mostly, pamphlets and so forth.

Question 56. What is your ethnic background? (Other-specify)

English American.

Eskimo.

European.

From India.

German.

No comment. (2)

Question 60. Do you own or rent your residence? (Other-specify)

Just moved temporarily back to parents'.

I'm still at home.
